THE AGELESS ERA:
REIMAGINING
HUMAN HEALTHSPAN

Peter Ottsjö

Author, Science Journalist, Longevity, Biotech and AI
at reachlevity.com; Longevity Biotech Fellow

Peter Ottsjö is the CEO of LEVITY Media Group, creator of the LEVITY newsletter, and co-host of the LEVITY podcast. Through these platforms (reachlevity.com), he explores biotechnology, geroscience, and the cultural and ethical dimensions of extending human lifespan. LEVITY's North Star is to shape the conversation that takes humanity to longevity and escape velocity.

A veteran journalist with more than three decades of experience, Peter also works as a tech reporter for Ny Teknik, Sweden's leading technology outlet, recently nominated for Magazine of the Year. He is also the author of "Evigt Ung: Min och Människans Dröm om Odödligheten", a widely discussed book on humanity's dream of overcoming aging.

With LEVITY, Peter connects scientists, entrepreneurs, and the public, making complex ideas about longevity science accessible and engaging. He frequently serves as a speaker and moderator at events in Sweden, where he advocates for broader discussion on aging, life extension, and the future of medicine.
